Progress and Development of BERRI-BIJJARGI

- Setting up of place for starting the activities
 - We have a building with a large multipurpose hall for all activities.
 - Attached to this is a small office room, resource room cum library
- We have acquired 4 acres of land for setting up a functional campus
- This campus is under development already with rainwater harvesting system, and many regular tree planting activities.
- We have been involved with the Karnataka State Akkamahadevi Women's university

Our Challenges

- Financial sustenance and fundraising
- Talking to young people about the need for taking up community service in their lives
- It has been difficult to get participation from rural women in Bijjargi. It has been a constant challenge to invite them to engage with issues larger than their own homes.
- Because of Covid-19 and associated lockdown, it was difficult to involve children in various activities in **2020-21** and **2021-22**
